

KITCHEN APPLIANCES : BUILT-IN ELECTRICAL OVENS (220V/60Hz)

	4153.0010 595 x 595 x 512mm	HI-435 Static oven (56 L.) : 3 cooking functions : double glazed door : fume exit outlet integrated in the handle : tray with Crystal Clean enamel : inner light, lamp indicator of thermostat
	4155.0210 595 x 595 x 562mm	HA-820 Multifunction oven (56 L.) : 5 cooking functions : inner wall with Crystal Clean enamel : full glass inner door : double glazed door : chromed tray guides : deep tray (50mm) & baking tray with Crystal Clean enamel : Mix Chamber Refrigeration System
	4155.2210 595 x 595 x 562mm	HA-840 Multifunction oven (56 L.) : 8 cooking functions : 5 buttons digital panel : double glazed doors : inner walls with self-cleaning catalytic panels : Maxi grill : deep tray (50mm) & baking tray with Crystal Clean enamel : Mix Chamber Refrigeration System
	4155.5010 595 x 595 x 562mm	HA-850 Multifunction oven (56 L.) : 9 cooking functions : finger-print-proof stainless steel front panel : triple-glazed door : inner walls with Crystal Clean enamel : deep tray (50mm) & baking tray with Crystal Clean enamel : Mix Chamber Refrigeration System : door opening security disconnection : children safety block
	4155.5010 595 x 595 x 562mm	HA-850 Multifunction oven (56 L.) : 9 cooking functions : finger-print-proof stainless steel front panel : triple-glazed door : inner walls with Crystal Clean enamel : deep tray (50mm) & baking tray with Crystal Clean enamel : Mix Chamber Refrigeration System : door opening security disconnection : children safety block

KITCHEN APPLIANCES : MICROWAVE OVENS (220V/60Hz)

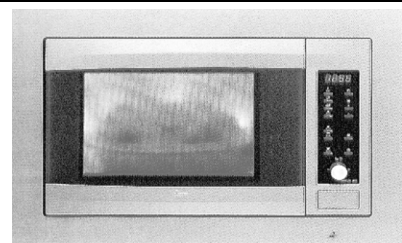

4159.2000
480 x 892 x 556mm

HA-900 Multifuntion oven (88 L.)
: 7 cooking functions
: triple-glazed door
: inner walls with Crystal Clean enamel
: Mix Chamber Refrigeration System

4057.9001
595 x 390 x 350mm

TMW.22.1.BI Microwave oven (20 L.)
: mechanical control panel
: quartz grill power 1000W
: five microwave power levels 800W
: forced air ventilation
: minute minder, maximum 60 mins.
: integrated rotary turntable
: automatic defrost by time
: stainless steel inner cavity
: built-in frame included

4057.9501
595 x 390 x 350mm

TMW.22.1.BIS Microwave oven (20 L.)
: digital control panel
: quartz grill power 1000W
: five microwave power levels 800W
: 3 cooking memories
: forced air ventilation
: digital timer, maximum 90 mins.
: + 1 minute button
: automatic defrost by time and weight
: stainless steel inner cavity, integrated rotar turntable
: built-in frame included

4159.7000
455 x 595 x 475mm

MW.32.BIS Microwave oven (32 L.)
: electronic control panel
: grill power 1500W
: 6 microwave power levels
: automatic defrost by weight and time
: forced air ventilation
: children safety lock

KITCHEN APPLIANCES : BUILT-IN STEAM OVEN (220V/60Hz)

HK.930S Steam oven (35 L.)
: 1 cooking function (steam) with digital display
: finger-print-proof stainless steel
: temperature range 40-80-100 degrees C
: external steam generator
: 4 cooking levels
: defrost function
: 1.2 L. water tank with indicators for limescale and lack of water
: door opening security disconnection
: double glass doors with inox tray supports

DEFINITIONS**MAXI GRILL**

A large and powerful 2600m grill will brown all surfaces of food in the tray while maintaining user safety. Alternatively, a useful fast heating function will increase power by 1450w before cooking starts, thereby reducing pre-heating time by 60%.

TURBO GRILL

The Teka turbo function entails cooking via a rear heating element with fan assistance, improving heat distribution to all areas of the oven. This means that simultaneous cooking can be carried out at different

FINGERPRINT-PROOF

Ovens and microwaves have the unique fingerprint-proof finish. This opaque sheen protects the stainless steel by increasing its resistance to dirt as well as preventing grease particles from accumulating on the surface.

CRYSTAL CLEAN ENAMEL

Teka coats the trays and oven cavities with a special enamelling process called Crystal Clean. This has superb resistance & hardness and provides a shiny, non-porous, non-stick surface. Ovens and trays are cleaned

MIX CHAMBER REFRIGERATION SYSTEM

The Air Mix Chamber System takes cold air from outside and a fan mixes it with hot air from the oven's inner cavity. This prevents the cabinet, the front of the oven and handles from becoming too hot. This system also avoids condensation on the inner glass of the door, as well as grease accumulation around the control panel.

TELESCOPIC TRAY GUIDES

Telescopic tray guides, with 3, 2 or 1 levels, enable trays to slide into various positions for removal of food without risk of burns, providing access to any level at any time. A large 50mm deep enamelled baking tray i
