## Elginkan Group

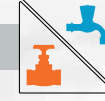

The foundation of Elginkan Group was laid in 1950 with an “Engineering Office” in Ankara. This small engineering office that was established by Mr. Ekrem Elginkan was dealing with the construction and contractual works in the field of radiator installation, potable water conveyance line and main, dam, railway, highways constructions. Along with the years, this office was turned into the partnership between Mr. Ahmet Elginkan and his sons i.e. “Mr. Ekrem Elginkan and Mr. Cahit Elginkan”.

Elginkan in 1957, the first capital letters of the father and sons are used to give the name of a new company e.g. “E.C.A Presdöküm Sanayi Limited Şirketi”. The company started to manufacture the sanitary armatures in 1957.

Since the first day when the company was established, the product range was extended each year including the valves and armatures, ceramic sanitary equipments, personal heating and cooling devices, gas-filled and electric water heaters, white& brown goods, gray cast iron products, casting, food, construction, industrial raw-materials.

Elginkan Group has adopted an approach to manufacture from the raw material to the final product so every single process from the planning to the marketing was included in the business activities of the company.

Elginkan Group employing 3000 workers and 19 companies keeps on going forward one step ahead in the industry and offers the best with its own brands i.e. E.C.A, SEREL, ARSEL, EMAS, ODÖKSAN, ELBA, AR, YAK and SPİL SEREL in the market.

## VALFSEL ARMATÜR SANAYİ A.Ş.

## E.C.A - Valfsel

Our company was founded in 1957 with the business name i.e. ECA Pres Döküm Sanayi Ltd. Şti. then the business title of the company was replaced with Valfsel Armatür Sanayi A.Ş. in 1978.

With the purpose to fulfil the needs of our customers in the field of sanitaryware industry, we primarily completed the investments for our brand ECA to produce the utmost quality so Manisa production plant was established in Manisa Organized Industry Zone in 1990.

On the other hand, Eltor A.Ş. dealing with the production activities in Edirne since 1972 has been incorporated within the body of the Valfsel A.Ş. in 1992 thus the corporate integration duly completed considering the standardization in whole production activities.

In respect of the effective cost control and planning as well as product development due to intensive R&D activities in due course, Samandıra production plant was moved to Manisa in 1995 and Edirne production plant in 2000, therefore all corporate resources have been used optimally on based of effective communication and planning processes.

Today, Valfsel Armatür Sanayi A.Ş. has been employing 140 personnel and 310 workers in two production plants i.e. Manisa 1 and Manisa 2. The company was established on a land of 62,281 square meters including an indoor area of 20,547 square meters. The product range of the company is composed of 4,200,000 pieces of various fixtures, sanitary fittings, interior mechanism, syphons and accessories in scope of annual process of brass products of 4980 tons.

The company's main product line includes the Single and Double Handle Shower and Bathroom Fittings; Single and Double Handle Tap, Lavatory and Bidet Faucets / Mixers, Infrared Taps and Mixers, Self Closing Taps and Mixers, Thermostatic Mixers, Concealed Bathroom Fixtures as well as internal mechanisms and Syphons and various Bath Accessories compatible with the produced fittings.

Besides the high capacity, Valfsel has taken part among some certain production plants in the world when considering its quality Casting, Forging, Multi-mills Vending, Multi-Station Machining, Polishing and Surface Coating and finally Assembly Units starting from design and planning stage.

*Special Series*

*Electra*

Electra Series representing the digital use in Faucet Industry is a complete leader of the new generation due to its sharp-line, exceptional, wide and flat form.

*Electra*

Let's imagine a mixer that immediately runs after you touch the control display buttons, enables you to adjust and keep the temperature of the water with +/- options; even the water runs out at intervals of 10-20 seconds, thus saves the water for the next generations.

*Luna*

Reflecting the glint of the Moon into your bathrooms by making a difference, Luna Series is one of the most stunning pieces of the new generation design trends. While the harmony between the arm and body dominates the design, crescent shaped spout form provides the inspiration for the product.

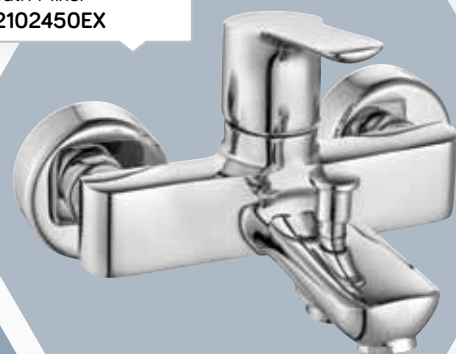

*Luna*

Use of embedded aerator eliminates the extra bolt nut view. So, while all details are hiding behind the design, lines come into the forefront. Having fine lines as well, Luna Series is a considerably ergonomic product with its long spout and height.

# *Infrared Basin Taps*

E.C.A's infrared faucets perceive your hands without touching; thus starts and ends the operation when you draw back your hands. Particularly for the common areas, it provides distinguished hygiene as well as hundreds of tons of water saving.

The products that provide maximum water and energy savings are offered with variable options whether single or double water inlet as well as electric or battery-powered alternatives.

# Thermostatic

Now, you have the chance to use two different mixers at any desired temperature at the same time. E.C.A thermostatic mixers eliminating the effect of hot and cold water pressure waves provide you with the comfort of using the water at temperature you adjusted.

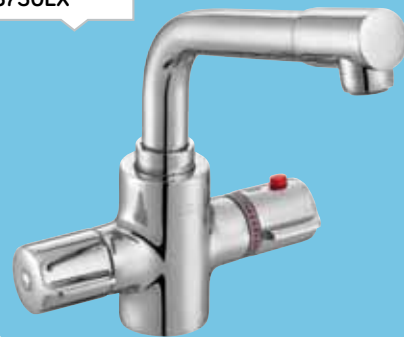

Water flowing out thanks to the red safety button installed on thermostatic mixers is limited to a safe degree e.g. 38°C. Both cost efficiency and full comfort are the advantages of thermostatic series keeping the water flow at desired temperature.

# *Self Closing Taps*

E.C.A's timed mixers are designed to let you take the decision for the flow time of water. With an adjustable timer from 5 seconds to 60 seconds, the comfort is now automatic.

## *Self Closing Taps*

When you push the mixer once, the water starts to flow out then it automatically stops flowing when pre-adjusted time is elapsed. Self closing taps are ideal for combined features of saving, comfort and aesthetic.

The logo is a hexagonal emblem. It features a central dark blue hexagon with a white outline. This central hexagon is surrounded by a ring of six medium blue hexagons, which are also outlined in white. The entire emblem is set against a background that is split horizontally: the top half is a solid blue color, and the bottom half is a light blue, crumpled paper texture.

*Shower Systems*

# Shower Columns

The shower systems designed by E.C.A for a distinctive pleasure of shower are intended to make you feel a priceless pleasure of shower.

## Shower Columns

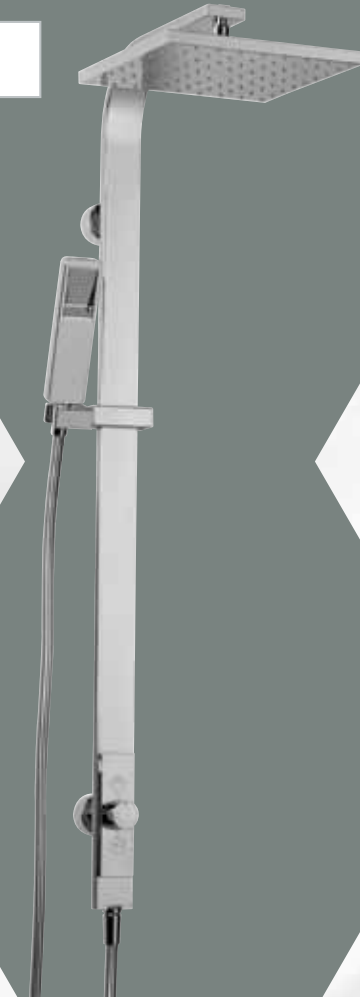

While rectangular or round cross section and heat-insulated water columns are adapting to every preference and every bathroom, angular and round rain-flow shower heads make you feel the pleasure of rain at any time in your bathroom. Thanks to different diameters multi-function hand shower sets making two times of shower pleasure, all energy of drops is conveyed to your body.
