Ideas for the bathroom.

Mixers · Showers · Shower Systems

8

Our family has a passion for water.

Schiltach has been the home of water pleasure since 1901.

"My grandfather was a very special man. A visionary. A perfectionist. A constant seeker, in the best sense. He was never satisfied with the status quo, but was always wanting to find better and more efficient solutions. Which is what we still aspire to today. To us, the perfect water experience is first and foremost a feeling. And this feeling includes knowing that we are doing something that is good for the environment as well as for ourselves. That is why we are constantly developing new

technologies to further increase your water pleasure and reduce water consumption at the same time. We are always tinkering and finishing, thinking and improving. And even when something is as it should be, we still carry on until it is as it could be. That is how our ideas for water become innovations in your bathroom. Experience award-winning design with innovative energy saving, and a very special kind of water fun."

Richard Grohe

Find all the latest news on everything to do with water and Hansgrohe on

For pure water pleasure. With a clear conscience.

At Hansgrohe, every drop counts.

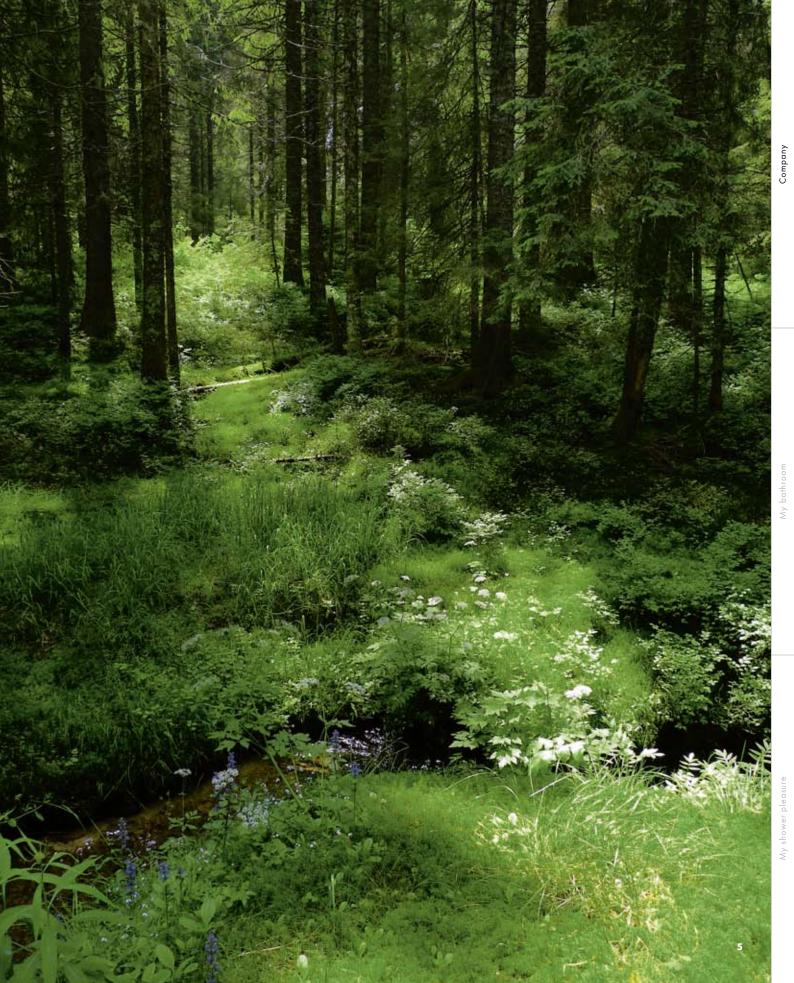

For 110 years, water has been the element that revives us, drives us, and to which we are wholly committed, body and soul. This tremendous passion flows into perfect design, and it obliges us to handle water responsibly. That is why we are constantly developing new sustainable technologies such as AirPower and EcoSmart that enable us to treat this precious resource with care and to help you minimize your consumption – which in turn has benefits for you and for the environment. After all, a lower water consumption means lower costs. Acting ecologically helps you to save money. It is this kind of action that has made us one of the first companies to receive the Water Efficiency Label (WELL) certificate of the European Association of Mixer Manufacturers for our products. Our basin mixers Talis, Focus, and Metris and our hand shower Crometta 85 Green have all received Level A for the home, which is the best possible result. We will continue to work in the future to develop products that have a positive effect on your life and with the environment.

Thanks to EcoSmart technology, Hansgrohe basin mixers have a consumption of just five litres a minute.

The efficient EcoSmart technology means that lots of Hansgrohe products will help you to save water and energy and reduce your CO₂ output. To find out just how much water you can save, go to **www.hansgrohe-int.com/savings-calculator**

AirPower: exceptional showering pleasure and large drops thanks to the addition of generous amounts of air.

QuickClean: Showerheads remain limescale-free and fully functioning for longer simply by rubbing over the silicone nubs.

Company

My bathroom

We live for water. See for yourself.

Innovative technologies for your personal water pleasure.

Water pleasure means something different to all of us. Some like it refreshingly sparkling; others like it soft and warm. Some need it in the morning to wake up, others in the evening to wash the day away. Our passion is to create the water pleasure that is absolutely right for every single individual. ComfortZone, XXL Performance, QuickClean, and the unbeatably pleasant shower experience provided by AirPower technology, are just a few of our innovations that also testify to the high "Made in Germany" quality standard of our products. Something else that shows how sure we are of this quality is the five-year guarantee that comes with every product. However, it's really only a pure conscience that makes for pure pleasure, and this is another area where we are constantly developing new technologies such as EcoSmart.

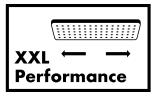

Combines water with a generous amount of air. For a soft, splashfree water jet and rich, full shower drops.

Keeps the flow to a minimum to save water and energy, without any loss of performance. For lasting pleasure.

Remove limescale deposits simply by rubbing the flexible silicone nubs.

Distributes the water over the large shower disc, so your whole body is completely enveloped in well-being drops.

Defines the individually utilisable area between basin and mixer, for all possible applications.

My shower pleasure

Incidentally, you will also find all the various technologies in a fold-out summary on the inside back page of the catalogue, so that you will always have our innovations and the corresponding information to hand as you look through it.

To us, perfect water pleasure also means perfectly shaped.

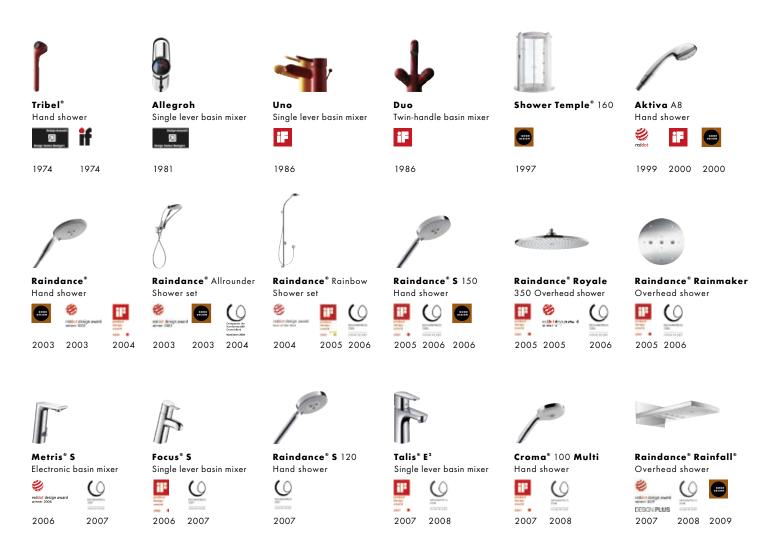

Hansgrohe is constantly setting new design standards.

To us, design is not a matter of taste; it is an attitude – even a passion. After all, you experience perfect water pleasure with every one of your senses. Which is why we work with international designers to come up with excellent creations. The result: with the Hansgrohe and Axor brands, Hansgrohe AG is the award-winning, no. 1 player in the sanitaryware industry, and with over 350 national and international design awards, one of the eleven highest-winning companies in the world.

Design is never an end in itself in our daily work; rather, it is the constant expression of the equality between form and function. The search for the smartest solution is our ultimate aim in order to create showers, mixers and comprehensive bathroom collections of exceptional quality that provide lasting pleasure, and in doing so redefine aesthetic standards.

Here is a selection of our award-winning products:

profluct design award 2011 2011

Turn your dream bathroom into reality with our three style worlds.

Design your feel-good bathroom with Avantgarde, Modern, or Classic.

The bathroom has long since progressed from being a purely functional room into a comfortable living area. More and more people are creating multi functional well-being rooms where design and home comforts are as valued as hightech functionality. The wellbeing culture adds its bit to this trend: the bathroom has also long been about relaxation and withdrawing from daily life. A room where you spend time. Our mixers reflect this development in the balance between perfect function and beautiful design. In order to provide you with orientation on your way to an individual bathroom, we have created three different style worlds for our products. You will find plenty of ideas for your dream bathroom and personal taste in these style worlds. Let us inspire you.

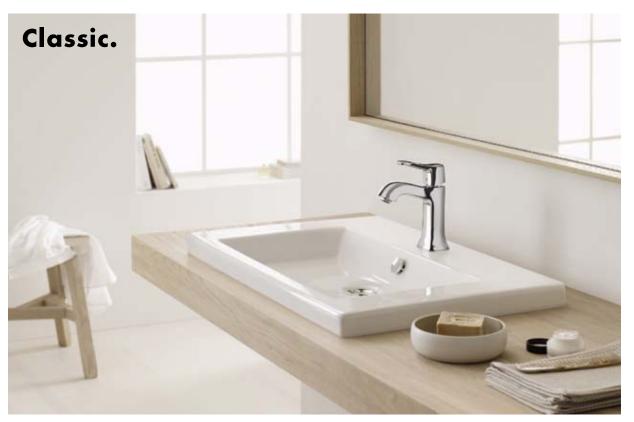

Give the room a special kind of sensuousness with the playful details of the emotional design language.

Why not look now to see which mixer will go best in your home using the Hansgrohe@home App or at **www.hansgrohe-int.com/iphone**

This style questions the form and functionality of everything. The result is a calm room that is notable for its clear lines and sensuous shapes.

A design language that equates to classic beauty, and radiates a warm, harmonious atmosphere.

The courage for a new shape: Avantgarde.

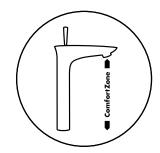

Company

Basin and kitchen

Pure. Clear. Sensuous.

Avantgarde is not about tomorrow's trends, but about your own trend. This style world plays with shapes to create the space for inspiration. In short: those who appreciate individuality will love **PuraVida.** The rounded lines and organic shapes radiate creative self-confidence. The unique materiality and design language of

the PuraVida product line is the forefront of the Avantgarde style world. The DualFinish process allows the surface materials to blend together smoothly. The PuraVida mixers are also available in various heights, for individual space that we call the ComfortZone.

Bath and shower

Strong character, right down the line.

The Avantgarde solutions for bath and shower facilitate creative, individual design ideas. The PuraVida mixers themselves become sculptures, and complete the image of a style world where the people who like the special things in life are at home. Proof of the idea that although a bathroom has to be functional, it can also develop its own character.

The art of omission: Modern.

Company

Basin

Reduced. Stylish. Functional.

Modern contains the idea of freeing oneself from the superfluous and the pompous to focus on the essential. A clear design language that leaves no questions unanswered. Clear lines lead to sensible utilisation. Everything is questioned. This results in a reduced, well planned whole. The combination of basin and mixer should also be considered carefully, because it is the matching ceramic that shows your mixer in the best possible light. Use the Configurator to find your dream combination of mixer and wall-hanging, free-standing or top-mounted ceramic basin.

www.hansgrohe-int.com/configurator

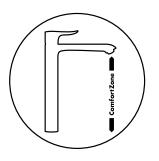

Basin

How high is just right for you?

We all use water differently; we all have our daily rituals and our own tastes. These different requirements are fulfilled by our new mixer series - by height, form, and function. The height of a mixer determines its versatility in the use of water. We have a name for the individually utilisable space between the mixer and basin: ComfortZone. Find the height that is absolutely right for you, your requirements, and your home. www.hansgrohe-int.com/comfortzone

The perfection of a feeling: Shower pleasure.

Let yourself be touched. In a thousand different ways.

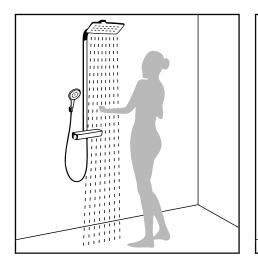

Choose your perfect shower situation from our range of showers.

Soft summer rain, a strong waterfall, | a reviving shower spray - or all three at the same time? Whatever your idea of the genuine shower pleasure in perfection.

perfect shower is, with our shower variations you will be able to turn your dream into

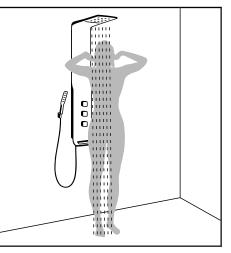

Design your individual shower - with the shower configuration that suits you.

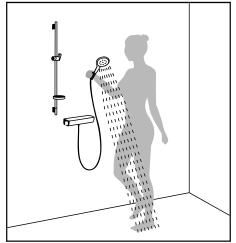

Showerpipe

Easy concealed installation – complete variability with minimum effort. Perfect for upgrading.

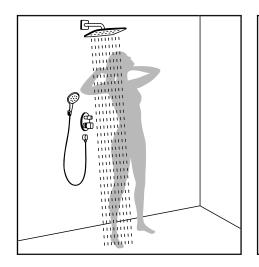

Showerpanel*

Combines overhead, hand, and side showers in a single system. The focal point in the bathroom in the exposedmounted version.

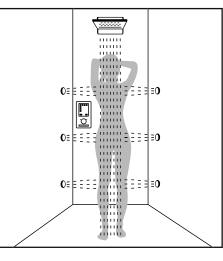

Shower set

The basic solution – offers the same full shower pleasure, and is also easy to mount on the wall.

Overhead and hand shower

For refreshing or relaxing – because every day deserves a different shower. Concealed installation, integrated in the wall.

Shower family

Showering cannot be more varied than with this concealed solution. From a waterfall to all-round pleasure.

CaresseAir.

massage spray.

RainAir.

This gentle shower rain with airenriched drops will help to wash daily life from you, drop by drop.

Whirl. A concentrated spray for massaging specific parts of the body.

88

RainAir XL. The very large shower disc envelops your whole body with soft drops.

For new energy after a challenging

day: The dynamic, revitalising

RainFlow. A powerful surge spray that makes you feel as if you were standing on your own in a lagoon. Every day.

Mix.

The harmonious combination of gentle shower drops and dynamic spray.

My bathroom

How to control your showering pleasure: Hansgrohe mixers and thermostats.

Find the right mixer solution to go with our wide range of showers.

Have you already chosen your new | dream shower? Then all you have to do now is decide how you wish to control the flow | to choose from, all based on the number of | refurbishment.

that will get you going in the morning. We | have a wide range of control options for you

showers, the desired ease of control, your aesthetic preferences, and the extent of the

Manual control – exposed

Exposed mixers are mounted on the wall and connected to the existing water supply. Highly recommended if only the mixer or thermostat is to be replaced in your bathroom refurbishment.

Exposed-mounted mixer for one shower.

Single-lever mixer to manually control water volume and temperature.

Exposed-mounted thermostat for one shower.

Use the left-hand control to adjust the water volume, and the right-hand one to set the temperature. The thermostat cartridge mixes the desired temperature in seconds and keeps it at a constant level.

Exposed-mounted thermostat for one shower.

Ecostat Select is the shape of thermostats to come. The increased shelf accommodates all your essential shower utensils.

Manual control – concealed

With concealed mounting, the body of the mixer is mounted inside the wall so only the controls and a flat rosette are visible on the outside. Highly recommended for extensive bathroom refurbishments, and if installing two or more showerheads.

Concealed thermostat – for one shower.

An elegant-looking solution. You can use the thermostat to set the desired temperature and operate a shower at the same time using the shut-off valve.

Concealed thermostat – for two showers.

Use the thermostat to set the desired temperature, and you can switch between two shower functions.

iControl[®] concealed thermostat with control unit – for three showers.

The temperature is set on the thermostat. Use the second control unit to manually switch between three different shower functions.

Electronic control – concealed

The concealed versions of the electronic control elements are also mounted out of sight inside the wall. Those who are planning a completely new bathroom can integrate smart shower technology from the outset.

iControl° mobile concealed thermostat with control unit – for three showers.

The concealed thermostat maintains the chosen temperature. Use the shower functions as well as the lighting to adjust up to three spray types and the lighting electronically. Thanks to digital radio technology, the control element can be removed and used as a remote control.

RainBrain[®] – shower electronics for even more choice.

Touchscreen control for everything – like having your own little personal shower computer. Whether the shower, spray type, lighting or the music from your iPod – you can control everything intuitively by touchscreen.

Award-winning diversity.

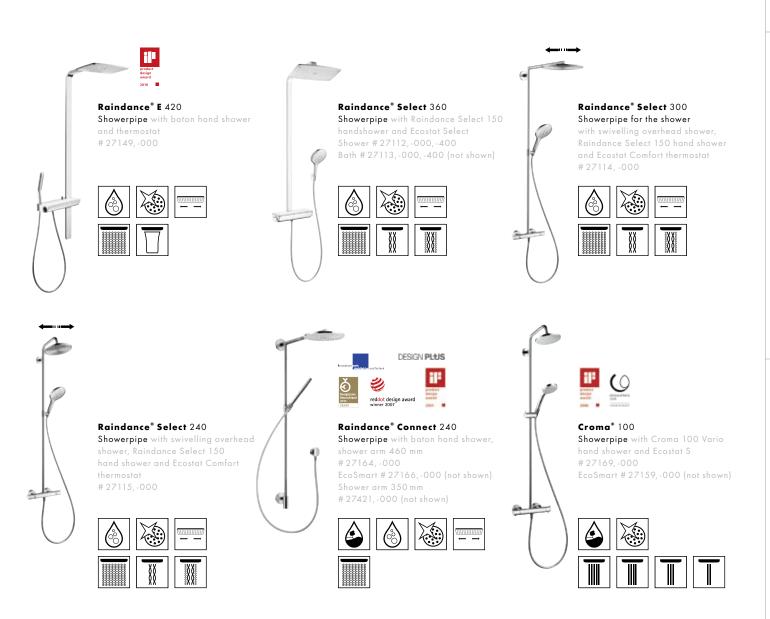

Discover the combination of thermostat, hand shower, and overhead shower.

The interplay between sophisticated technology, perfect forms, and precisely matched components can be experienced in the most diverse versions of the of form and combination is the option

Hansgrohe Showerpipes. Whichever shape and combination you prefer, your shower pleasure will be incomparable. Regardless

of simply mounting our Showerpipes on existing wall connections.

Company

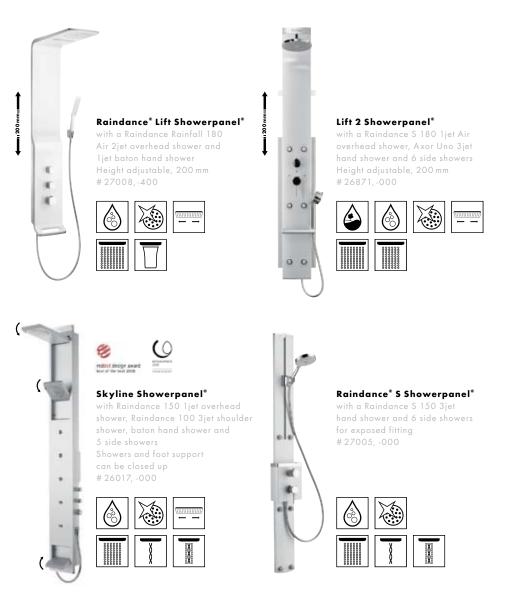

My shower pleasure

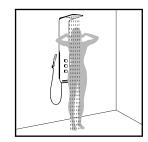

Treat yourself to water fun from all sides.

Showerpanel[®] - for variety when showering.

Overhead, hand, and side showers; various jet types including the RainFlow, and refreshing full-body massages from the side jets: a Hansgrohe Showerpanel brings all-round water fun. It couldn't be easier to install: simply use your existing connections for the upgrade – no need to conceal in the wall. And you'll soon have XXL shower pleasure in your bathroom.

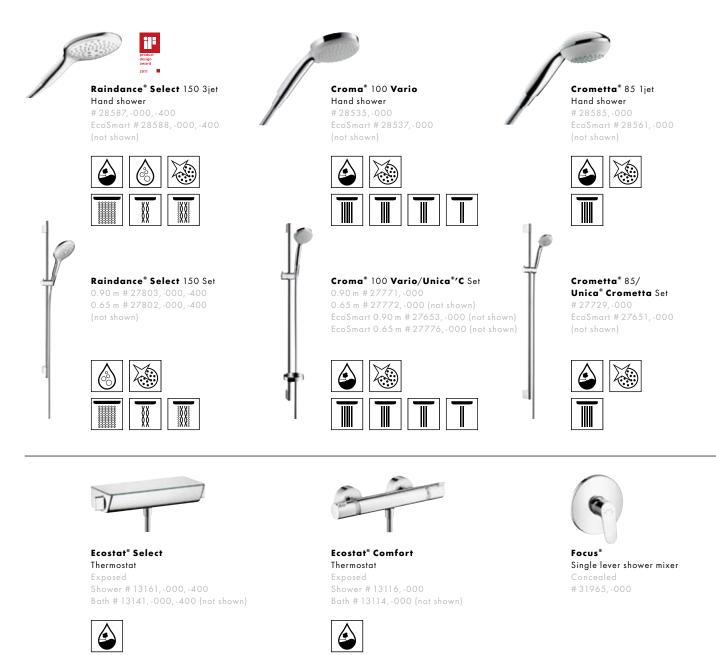

Find your own shape of perfection.

Experience individual comfort in form and function.

A good-looking combination. The Raindance Select hand showers have won the internationally renowned iF design award, and will refresh you with three different spray types. The showers shown

below are all available either individually or as a set, starting with the basic version of the Crometta, then the Croma, and on to the luxury version of the Raindance Select. Combining it with the Ecostat Select thermostat makes the Raindance Select hand shower easier to use than ever before. The shelf also provides an entirely new feeling of space under the shower.

Showering on top form.

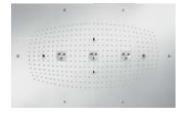

RainBrain[®] - how a computer controls your showering pleasure.

RainBrain is a small computer that enables you to control your shower with complete ease by Touchscreen. For even greater shower pleasure – under your Rainmaker, for instance, or Rainfall. From changing the spray types and adjusting the temperature in 0.5°-increments to choosing your favorite tunes via Bluetooth, RainBrain makes your shower intelligent, and showering a perfect experience. A simple touch of the control panel is all it takes to change from a well-being shower, for instance, to an energizing all-over massage. And you can keep discovering a new kind of shower. Of course, you can also continue to control your shower manually using iControl. But the choice is yours. That's pure shower luxury.
